Edrak Privacy & Data Governance Policy

1. Overview

Edrak provides a secure software layer that enables organizations to access and use multiple AI models (LLMs) within a controlled, enterprise-grade environment.

Edrak is designed to maximize productivity while ensuring that data privacy, governance, and control remain with the customer at all times, in compliance with applicable laws and regulations in the Kingdom of Saudi Arabia.

---

2. Data Ownership

- Customers retain full ownership and control of all data processed through Edrak
- Edrak does not claim any ownership rights over customer data, prompts, or outputs
- Data is processed solely for the purpose of delivering the service and improving platform functionality

---

3. No Model Training on Customer Data

- Customer data is not used to train any AI models
- This applies to:
    - Edrak systems
    - Integrated third-party AI providers (subject to their enterprise terms)
- All interactions are handled in a manner designed to maintain confidentiality and isolation

---

4. Data Privacy & Security

Edrak implements enterprise-grade security measures, including:

- Encryption of data in transit and at rest
- Secure API integrations with AI model providers
- Role-based access controls (RBAC)

- Workspace-level data segregation

Edrak takes commercially reasonable measures to protect customer data against unauthorized access, disclosure, or misuse.

---

5. Governance & Administrative Control

Organizations maintain full control over their environment, including:

- Administrative dashboards for monitoring usage and activity
- User management (add, remove, and manage access levels)
- Visibility into usage metrics and system activity

Edrak provides the tools required for organizations to implement their own internal governance policies.

---

6. Data Usage Philosophy

Edrak provides infrastructure and control.

- Customers are responsible for defining their own internal AI usage policies
- Users are expected to act in compliance with applicable laws, regulations, and organizational policies

Edrak does not assume responsibility for how customers choose to use AI within the platform.

---

7. Third-Party Model Integrations

Edrak integrates with leading AI providers (e.g., OpenAI, Google, Anthropic).

- Data shared with such providers is processed solely to generate responses
- Such providers may be subject to separate terms and policies
- Edrak does not control third-party systems and disclaims liability arising from their use, to the extent permitted by law

---

8. Data Retention

- Customers retain control over their data retention practices where technically feasible
- Edrak retains data only as necessary to operate and secure the service
- Data deletion requests will be honored in accordance with applicable laws and technical constraints

---

9. Compliance

Edrak is designed to align with recognized standards and applicable regulations, including:

- Relevant data protection laws and regulations in the Kingdom of Saudi Arabia
- International best practices (e.g., SOC 2 principles, GDPR-aligned concepts where applicable)

Customers remain responsible for ensuring their use of Edrak complies with laws applicable to their operations.

---

10. Policy Updates

Edrak may update this policy from time to time to reflect changes in law, regulation, or product functionality.

Material updates will be communicated where required.

Acceptable Use & Platform Integrity

11. Acceptable Use

Edrak must be used in a lawful, responsible, and compliant manner.

Users may not misuse the platform or attempt to bypass its safeguards.

---

12. Prohibited Activities

Users must not use Edrak to:

- Coordinate or facilitate malicious activity, including attempts to bypass safeguards, detection systems, or platform controls
- Engage in automated account creation, spam, or abusive behavior
- Circumvent account restrictions or bans, including enabling access for restricted users
- Provide access to Edrak in violation of applicable laws, sanctions, or jurisdictional restrictions
- Attempt to bypass, manipulate, or exploit system safeguards (including prompt injection or jailbreaking) to generate harmful or prohibited outputs
- Use Edrak, or any inputs or outputs generated through it, to train, replicate, reverse engineer, or develop competing AI models or services without prior written authorization

---

13. Enforcement

Edrak reserves the right, at its sole discretion, to:

- Monitor usage for security and compliance purposes
- Investigate suspected violations
- Restrict, suspend, or terminate access without prior notice where misuse is identified

Edrak shall not be liable for any consequences arising from enforcement actions taken in good faith.

---

14. Third-Party Terms

Use of integrated AI models through Edrak may be subject to additional third-party terms and conditions.

Users are responsible for complying with such terms where applicable.

---

15. Limitation of Responsibility

Edrak provides the platform “as is” and does not control or assume responsibility for:

- Customer inputs or outputs generated through AI models

- Decisions, actions, or outcomes resulting from use of the platform
- The performance or behavior of third-party AI providers

To the fullest extent permitted by law, Edrak disclaims liability arising from misuse or unauthorized use of the platform.
